## WORK EXPERIENCE

---

**Lembaga Pengembangan Komputerisasi (LepKom) Gunadarma** – Depok, Indonesia Sep 2023 – Sep 2025

*Course Instructor & Assistant*

- Assisted in guiding and training Comprehensive Oracle & C# Courses with over 100 participants, providing in- depth knowledge of fundamental concepts and advanced techniques.
- Supported in enhancing participants' skills in PL/SQL for Oracle Database Management, dynamic website development using C# and .NET, and also assisted in networking sessions using Cisco and Mikrotik.

**PT Mega Manunggal Property Tbk** – Jakarta, Indonesia Sep 2024 – Feb 2025

*Information Technology Intern*

- Prepared system documents including BRD and FSD with supporting diagrams such as Activity, UML, Flowchart, Use Case, and Database Schema.
- Analyzed, visualized, and cleaned over 2,000 internal records using Google Looker to identify recurring data, evaluate UI/UX, and build operational dashboards.
- Designed and implemented testing modules, test case, and User Acceptance Testing (UAT) for 6 internal systems to ensure quality and smooth business processes.
- Designed UI/UX for 6 internal systems to enhance usability and workflow efficiency using Figma.

*Achievement:*

- Created and won the best business process flow design during internship.

## PROJECTS

---

**Redesign UI/UX M-Paspor Application**, *UI/UX Designer* July 2025

- Redesigned the UI/UX of the M-Paspor application using Figma with the UCD method to improve usability and overall user experience.
- Conducted user research, prototyping, and usability testing.
- Improved usability score from 29.17 (Poor) to 82.08 (Good) based on the SUS survey of 30 respondents.

**Finance Accounting System – Website**, *Business Analyst/Product Manager (Mega Manunggal Property)* Feb 2025

- Developed a Finance Accounting System to automate journal entries and streamline financial processes.
- Conducted requirements gathering and analysis, then prepared detailed Business Requirement Documents (BRD) outlining system functionalities, business rules, and automation workflows.
- Planned project timeline, defined development tasks, and coordinated with the team.
- Performed User Acceptance Testing (UAT) to validate functionality and ensure business alignment.

### **JejakSiKecil – Child Development Website, FullStack Developer**

May 2024

- Built a website that presented information and articles on child development, and provided real-time communication and information-sharing services through comments.
- Developed the project by applying the Software Development Life Cycle (SDLC) methodology, including requirement analysis, design, development, testing, and deployment stages.
- Utilized PHP Native, Bootstrap, CSS, and AJAX to enhance responsiveness and user interaction.

### **TerbangAja – Flight Ticket Booking Website, Front-End Developer (Binar Academy)**

Feb 2024

- Developed a flight ticket booking website called TerbangAja to help users search and book flights easily and efficiently.
- Built the front-end using ReactJS, Redux, and Bootstrap for responsive and dynamic user interfaces.
- Integrated Google OAuth for secure and seamless user authentication.
- Applied the Agile development methodology to manage tasks, perform iterative testing, and ensure continuous improvement throughout the development process.

## **ORGANIZATIONS EXPERIENCE**

**Karang Taruna, Jakarta, Indonesia**

Jul 2019 – Sep 2023

*Leader*

- Led and organized various social and community activities to strengthen social engagement.
- Initiated social actions to support communities affected by natural disasters.
- Managed Independence Day celebrations by organizing 15 competitions and hosted a cultural & art performance to celebrate Indonesia's Independence Day with local residents.
